# Bringing stones to life

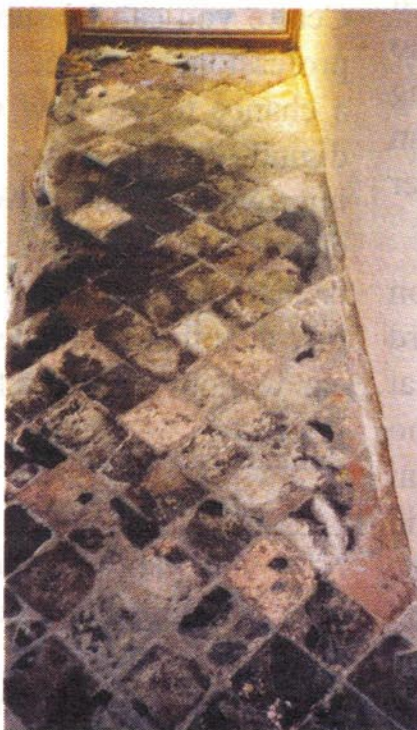

*Advertiser's Profile*

**TIM AND Sue Stamp have recently set-  
tled in the Algarve where they hope to  
continue their very successful UK busi-  
ness in natural stone refurbishment and  
maintenance. After carefully looking at the  
market in the Algarve and talking with in-  
dividuals and companies alike, it quickly  
became apparent that not only was this  
unique service not being offered to home-  
owners but that there was a real need for  
professional business of this type.**

Stone Care Services (SCS) has been ac-  
tively involved with the refurbishment and  
maintenance of all natural stone surfaces –  
floors, patios, vanity tops, fireplaces, shower  
surrounds and so on – for many years. Spe-  
cialising in all types of natural stone – mar-  
ble, granite, limestone, ceramics and terracotta –  
SCS can quickly regain a floor's natural beauty  
and depth of colour by using a combination of  
chemicals and specialised machinery.

Over time, any stone surface will become  
dull and lacklustre through foot traffic, food  
or drink staining and the incorrect use of  
cleaning materials. This is where Tim's ex-  
pertise in this highly skilled niche market  
comes to the fore – he is able to regain a  
stone's natural lustre without the need to  
undertake an expensive replacement.

Unightly stains and scratches can be re-  
moved (in most cases completely) to reveal  
the original surface once again. Sealing of  
surfaces against staining is another impor-  
tant aspect of the work undertaken by SCS.

• Before and after the refurbishment

Stone Care Services can offer advice on  
all stone surface types while suggesting  
techniques for their refurbishment and on-  
going maintenance. The process of refur-  
bishment is quick, dust and odour free – and

the cost is extremely reasonable. Contact  
Tim now for a free quotation or just ad-  
vice on any stone refurbishment queries  
you may have. Mobile 919 498 258 or
